

Double arm task light #TL3336

HOW GINGKO STARTED

From halogen/incandescent bulb, fluorescent lamp, and finally to LED, we are a fully experienced task light supplier, with the capability to design and to manufacture.

WHAT GINGKO ACHIEVED

Our design capability is approved by major international design awards, including IF of Germany, IDEA of USA, and G-mark of Japan.

WHAT GINGKO IS DOING

We continue to develop high end task lights with modern style, perfect illumination, sustainable quality, and affordable prices.

- Only high quality LED chips from NICHIA are installed to ensure quality and comfortable light output.
- LED chips are carefully arranged to produce broad and extensive illumination on user's workstation desktop.
- All joints are easily adjustable, both horizontally and vertically, to satisfy all kinds of possible needs at work.
- Metals like aluminum and stainless steel are widely used. Can be manually dismantled for recycle after life span.

Designer: Chen, Wen-tsung 2013

Technology: stretchable double arm

Surface/color: anodized silver w/ black joints

Material: aluminum, zinc, stainless steel, plastic

Light source: NICHIA LED 10W

Color temperature: warm white 4000K

Color accuracy: CRI > Ra90

Emission: semi-reflectional asymmetric

Dimming system: 3-step touch control

Diffusing design: patented anti-glare

Power supply: wall-mount LED driver

Input voltage: universal 100-240V

Switch type: integrated touch panel

Power consumption: 12W

Application

office
 private residence
 hospitality hotel

Dimensions

Length: 450mm (shade)
 Height: 940mm (upper+lower arm)

Fastening (optional)

desk base
 desk clamp
 floor standing set
